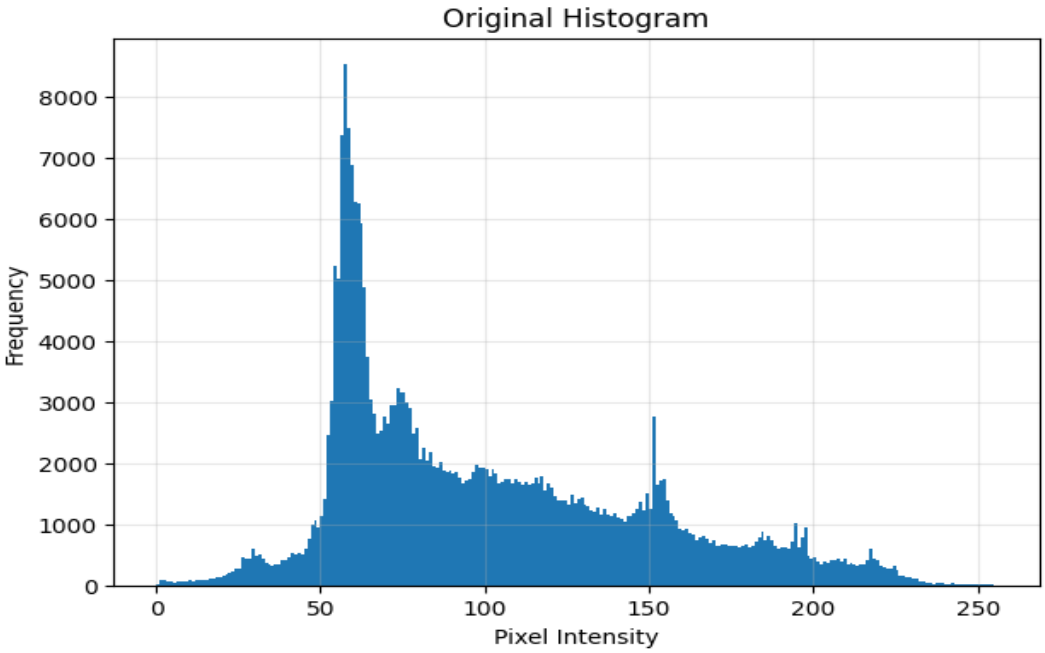
IMAGE PROCESSING REPORT

Image Path: D:\ImgProject\split_dataset\train\plastic\plastic390.jpg

1. Original Image

Brightness Value: 100.47

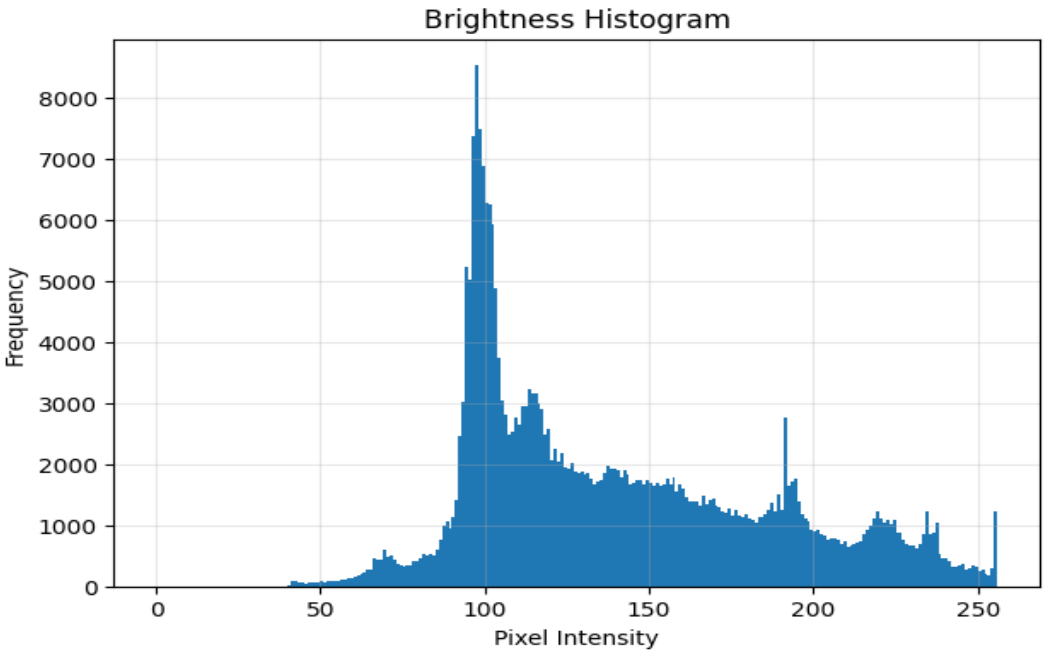
Observation: Original image before enhancement.



2. Brightness Adjustment

Brightness Value After Adjustment: 139.78

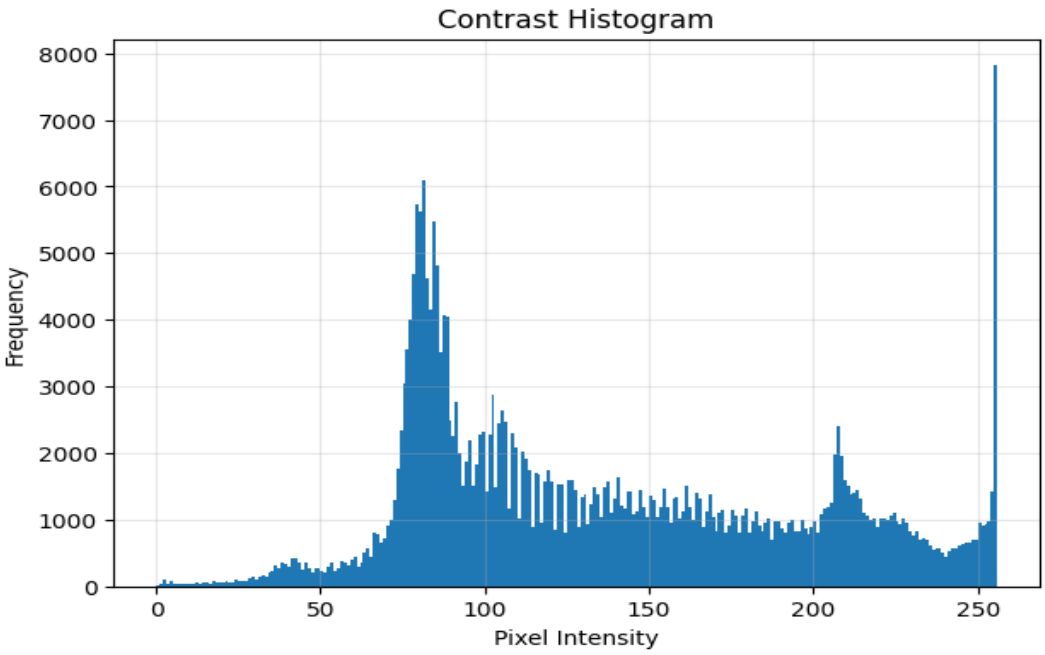
Observation: Visibility improved by increasing brightness.



3. Contrast Adjustment

Contrast Result Brightness Value: 136.80

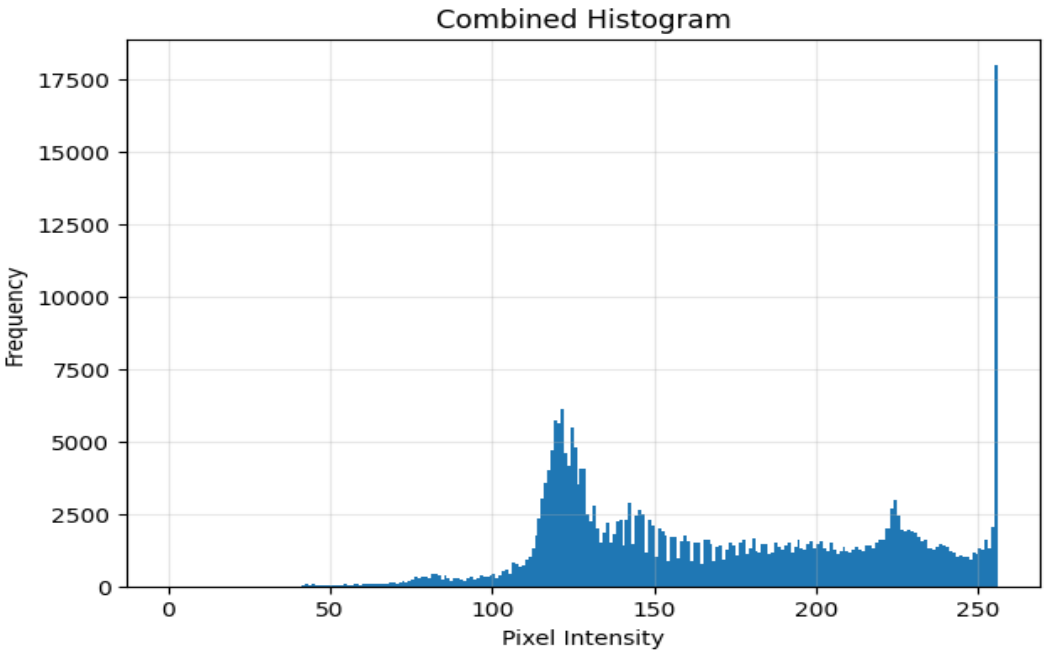
Observation: Contrast improved and object boundaries became clearer.



4. Brightness + Contrast Combined

Combined Adjustment Brightness Value: 170.95

Observation: Best enhancement result with clearer and brighter object appearance.



Final Insight

Brightness and contrast enhancement improves image visibility, supports better object recognition, and helps improve classification performance.
